

NEW GENERATION DAF

Car transporter

The power of applications

In the competitive car transportation industry, operators face the challenge of maximising payload while adhering to height regulations. DAF addresses this need with a range of industry-specific solutions. DAF offers vehicles specified with low roof cabs and low chassis frames to accommodate any superstructure, as well as a dedicated pusher axle that enhances payload capacity and stability.

Committed to fuel efficiency, performance, and up-to-date with the latest benchmarks in safety, DAF Trucks incorporates advanced safety features and class-leading efficient engines that reduce fuel consumption, enabling operators to save costs while ensuring secure vehicle transport.

XD over-cab carrier car transporter

XD

Features

- Optional conversion to 6x2 rigid chassis (up to 25.5 tonnes), including dedicated wide track pusher axle (17.5", 4.5 tonnes)
